

**BOTH ENDS OF THE WORK ZONE
MONITORED SIMULTANEOUSLY AND SAFELY**

**TRAFFIC CONTROL
PERSON WITH HUB STATION**

The traffic control person (TCP) is able to visually monitor and control traffic from the safety of a vehicle by means of the hub station. The hub station is outfitted with antennas, wireless receivers, display screen and power supply.

The TCP can be positioned up to three-quarters of a mile away from each signal trailer.

Video feeds from both ends of the work zone are wirelessly transmitted to the hub station.
